

Arctic Wolf® Threat Intelligence

Stay Ahead of Evolving Threats

In the modern threat landscape, it's difficult for organizations to know which new threats may target their industry or business. The challenge of trying to stay on top of threats is compounded by the large amount of threat intelligence that can be observed and consumed.

Harness the same threat intelligence gathered and utilized by the Arctic Wolf Security Operations Center (SOC) to proactively defend against new and evolving threats. Arctic Wolf Threat Intelligence delivers only the most important information you need to remain connected to the threat landscape. Gain real-time threat campaign notifications and, with indicators of compromise (IOC) QuickLinks into Data Explorer, quickly search your own environment for threats.

FEATURE

BENEFIT

Curated threat intelligence reports

Relevant, easy-to-digest reports, saving you time and ensuring you only see the most critical data.

Intelligence briefings

Learn about the latest threat campaigns Arctic Wolf is monitoring, industries under pressure, and notable attack vectors and strategies in a quarterly on-demand webinar.

Built on the Arctic Wolf Aurora Platform

Arctic Wolf Threat Intelligence is built on the same foundation that fuels the Arctic Wolf SOC, drawing from an immense dataset of over nine trillion security observations per week across more than 10,000 customers.

Arctic Wolf Threat Intelligence

Arctic Wolf Threat Intelligence enables organizations to leverage the same intelligence that powers the Arctic Wolf SOC, delivering real-time data on emerging threats. With curated reporting and real-time threat campaign notifications, businesses stay informed and increase prevention without needing to sift through vast amounts of information.

Arctic Wolf Threat Intelligence leverages over nine trillion weekly security observations across 10,000+ customers, spanning industries and geographies, and provides actionable insights in an easy-to-digest format.

With the integration of IOC QuickLinks into Data Explorer, customers can rapidly check their environments for active threats and take swift action to mitigate risks.

FEATURE	BENEFIT
Engaging content production	High-quality content is presented in a memorable format, produced by the same team that creates Arctic Wolf's Managed Security Awareness® content.
Real-time threat campaign bulletins	Receive immediate bulletins about active threats, enabling you to act before attacks materialize.
IOC QuickLinks	Easily search your environment by leveraging Arctic Wolf® Data Explorer for IOCs, streamlining the threat validation process.
Block / allow lists	Utilize intelligence to update block / allow lists for your security tools and appliances, such as endpoint detection and response (EDR) and firewalls, with downloadable .txt files with malicious URLs, domains, and hashfiles.

Threat Intelligence Plus

Threat Pulse

- Threat reports
- Intelligence briefings
- IOC QuickLinks*

Intelligence Feed

- IOC block / allow lists (URL, domain, hashes)
- Externally Ingestible (STIX/TAXII)

*Available for Data Explorer customers only

About Arctic Wolf

Arctic Wolf® is a global leader in security operations, delivering the first cloud-native security operations platform to end cyber risk. Built on open XDR architecture, the Arctic Wolf Aurora™ Platform operates at a massive scale and combines the power of artificial intelligence with world-class security experts to provide 24x7 monitoring, detection, response, and risk management. We make security work.
